### /api/user

#### /api/user/info - Informação do Utilizador

##### GET ..../api/user/info - sem autenticação

(0)

http://brandic.devll.eu:61080/api/user/info

Devolve:

```
{ "error": 1, "message": "Por favor efectue autenticação",  
"res": {} }
```

Example Request ..../api/user/info - sem auten...

```
curl --location --request GET "http://brandic.devll.eu:61080/api/user/info" \  
--header "Content-Type: application/x-  
www-form-urlencoded"
```

##### Headers

Content-Type	application/x-www-form-urlencoded
--------------	-----------------------------------

## GET ..../api/user/info - após autenticação

0 (0)

<http://brandic.devll.eu:61080/api/user/info>

Example Request ..../api/user/info - após auten...

```
curl --location --request GET "http://brandic.devll.eu:61080/api/user/info"
```

Devolve:

```
{ "error": 0, "message": "Bem-vindo Teste2 Teste", "res": {  
    "id": 2, "full_name": "Teste2 Teste", "email":  
        "teste123456@ipt.pt (mailto:teste123456@ipt.pt)",  
    "address": "Teste2", "birthday": "02/04/1992",  
    "cellphone": "987654321", "type_user": "User",  
    "id_type_user": 2, "last_login":  
        "2019-04-16T10:11:41.424Z", "register_date": null, "title":  
        "dont6", "qualifications": "have6" } }
```

## /api/user/auth - Autenticação de Utilizadores

### POST ..../api/user/auth - password errada

0 (0)

<http://brandic.devll.eu:61080/api/user/auth>

Example Request ..../api/user/auth - password ...

```
curl --location --request POST "http://brandic.devll.eu:61080/api/user/auth" \  
    --header "Content-Type: application/x-www-form-urlencoded" \  
    --data "email=teste123456@ipt.pt&password=1234560000"
```

Devolve:

```
{ "error": 1, "message": "Ocorreu um erro na autenticação, verifique se todos os campos são válidos",  
    "res": {} }
```

#### Headers

Content-Type application/x-www-form-urlencoded

#### Body urlencoded

email	teste123456@ipt.pt
-------	--------------------

password	1234560000
----------	------------

## POST ..../api/user/auth - sem todos os campos

0

<http://brandic.dev11.eu:61080/api/user/auth>

Devolve:

```
{ "error": 1, "message": "Todos os campos são obrigatórios", "res": {} }
```

### Headers

Content-Type	application/x-www-form-urlencoded
--------------	-----------------------------------

### Body urlencoded

password	12345
----------	-------

## POST ..../api/user/auth - campos inválidos

0

<http://brandic.dev11.eu:61080/api/user/auth>

Devolve:

```
{ "error": 1, "message": "Ocorreu um erro na autenticação, verifique se todos os campos são válidos", "res": {} }
```

### Headers

Content-Type	application/x-www-form-urlencoded
--------------	-----------------------------------

Example Request ..../api/user/auth - sem todos...

```
curl --location --request POST "http://brandic.dev11.eu:61080/api/user/auth" \
--header "Content-Type: application/x-www-form-urlencoded" \
--data "password=12345"
```

Example Request ..../api/user/auth - campos inválidos

```
curl --location --request POST "http://brandic.dev11.eu:61080/api/user/auth" \
--header "Content-Type: application/x-www-form-urlencoded" \
--data "email=email&password=123456"
```

### Body urlencoded

email	email
password	123456

## POST ..../api/user/auth - autenticação com sucesso

0 (0)

<http://brandic.devll.eu:61080/api/user/auth>

Devolve:

```
{ "error": 0, "message": "Autenticado com sucesso", "res":  
{ "id": 2, "full_name": "Teste2 Teste", "email":  
"teste123456@ipt.pt (mailto:teste123456@ipt.pt)",  
"address": "Teste2", "birthday": "02/04/1992",  
"cellphone": "987654321", "type_user": "User",  
"id_type_user": 2, "last_login":  
"2019-04-16T10:10:53.580Z", "register_date": null, "title":  
"dont6", "qualifications": "have6" } }
```

Example Request ..../api/user/auth - autenticação...

```
curl --location --request POST "http://brandic.devll.eu:61080/api/user/auth" \  
--header "Content-Type: application/x-www-form-urlencoded" \  
--data "email=teste123456@ipt.pt&password=123456"
```

### Headers

Content-Type	application/x-www-form-urlencoded
--------------	-----------------------------------

### Body urlencoded

email	teste123456@ipt.pt
password	123456

## POST ..../api/user/auth - repetir a autenticação já autenticado

0 (0)

<http://brandic.devll.eu:61080/api/user/auth>

Example Request ..../api/user/auth - repetir a autenticação já autenticado

Devolve:

```
{ "error": 0, "message": "Utilizador já se encontra autenticado", "res": { "id": 2, "full_name": "Teste2 Teste", "email": "teste123456@ipt.pt", "mailto:teste123456@ipt.pt)", "address": "Teste2", "birthday": "02/04/1992", "cellphone": "987654321", "type_user": "User", "id_type_user": 2, "last_login": "2019-04-16T10:11:14.070Z", "register_date": null, "title": "dont6", "qualifications": "have6" } }
```

```
curl --location --request POST "http://brandic.dev11.eu:61080/api/user/auth" \
--header "Content-Type: application/x-www-form-urlencoded" \
--data "email=teste123456@ipt.pt&password=123456"
```

## Headers

<b>Content-Type</b>	application/x-www-form-urlencoded

## /api/user/logout - Logout dos Utilizadores

### GET ..../api/user/logout - realizar logout

 (0)

<http://brandic.dev11.eu:61080/api/user/logout>

Example Request ..../api/user/logout - realizar l...

```
curl --location --request GET "http://brandic.dev11.eu:61080/api/user/logout"
```

Devolve:

```
{ "error": 0, "message": "Sessão terminada com sucesso", "res": {} }
```

Example Request ..../api/user/logout - realizar l...

### GET ..../api/user/logout - realizar

## logout sem autenticação

0 (0)

```
curl --location --request GET "http://brandic.devll.eu:61080/api/user/logout"
```

```
http://brandic.devll.eu:61080/api/user/logout
```

Devolve:

```
{ "error": 0, "message": "Sessão terminada com sucesso",  
"res": {} }
```

## /api/user/list - Listar os Utilizadores

### GET ..//api/user/list - obter lista de utilizadores sem autenticação

0 (0)

```
http://brandic.devll.eu:61080/api/user/list
```

Devolve:

```
{ "error": 1, "message": "Não tem permissões para listar  
utilizadores", "res": { "users": [] } }
```

Example Request ..//api/user/list - obter lista d...

```
curl --location --request GET "http://brandic.devll.eu:61080/api/user/list"
```

### GET ..//api/user/list - obter lista de utilizadores com autenticação com usertypeid 2

0 (0)

```
http://brandic.devll.eu:61080/api/user/list
```

Devolve:

```
{ "error": 1, "message": "Não tem permissões para listar  
utilizadores", "res": { "users": [] } }
```

Example Request ..//api/user/list - obter lista d...

```
curl --location --request GET "http://brandic.devll.eu:61080/api/user/list"
```

# GET ..../api/user/list - obter lista de utilizadores com autenticação com usertypeid 1

 (0)

Example Request ..../api/user/list - obter lista d...

```
curl --location --request GET "http://brandic.dev11.eu:61080/api/user/list" \
--data ""
```

http://brandic.dev11.eu:61080/api/user/list

Devolve:

```
